30. NEW RECORD OF *ALEUROCANTHUS MARTINI* DAVID, HOMOPTERA: ALEYRODIDAE, FROM INDIA

The whitefly genus *Aleurocanthus* Takahashi is represented in India by 20 species (Jesudasan and David 1991). David (1993) described *Aleurocanthus martini* David from Sri Lanka infesting *Sebastiania chamaelea* Mull-Arg. (Euphorbiaceae). In the present communication, we are reporting this species for the first time from India, breeding on 11 host plants in the Western Ghats.

31. NEW RECORD OF BROWN MUSSEL *PERNA INDICA* KURIAKOSE AND NAIR 1976, FROM KARNATAKA COAST

Mussels (Phylum Mollusca, Class Pelecypoda, Order Filibranchiata, Family Mytilidae) form one of the most common food sources, generally termed as poor man's food and make

a sizable contribution to marine fisheries. In the past few years, in order to meet the ever-increasing demand for protein-rich nutrition, mussel culture has been taken up as a prospective
